📋 CAREER OBJECTIVE

As a full-stack developer with 3+ years of experience in Node.js and React, my goal is to use my expertise in these technologies to build high-quality and scalable applications that meet the desired requirements. I am committed to continuously improving my skills and knowledge, and to taking on more challenging projects and responsibilities. In the long term, I hope to become a subject matter expert in React and to take on leadership and mentorship roles within my team or organization.

💼 PROFESSIONAL EXPERIENCE

Infosys Limited

Technology Analyst

Jul 2022 – present | Mangalore, India

- Built an optimised search engine by debouncing and sorting functionalities for a better user interface.
- Building and deploying applications on the AWS platform using services like S3, DynamoDB, Lambda, CloudWatch and more.
- Worked in an Agile environment and automated deployment process for smooth and error-free deployment.
- Used JIRA as a bug tracking system to track and maintain a history of bugs/issues on an everyday basis and used GIT/Bitbucket to manage versions of the codebase.
- Worked with Junit unit testing framework to write unit tests for JavaScript code.
- Collaborated with clients directly to design and implement new features and functionality.

Senior Systems Engineer

Jun 2021 – Jun 2022 | Mangalore, India

- Developed and maintained highly scalable and performant user interfaces for Retail billing applications using React, Redux, React Hook, React-Router, HTML5, and CSS to accommodate all required business functionalities.
- Developed a customizable dashboard for the Retail Billing Application using ReactJS to track, analyze, and get an overall view of the data.
- Built microservices with NodeJS to increase the scalability, operability, and productivity of the application.
- Created operational and workflow documentation to enable onboarding members to work with minimal disruption.

Systems Engineer

Oct 2019 – Jun 2021 | Bangalore, India

- Transformed the application into a single-page application using React-Router and Redux concepts.
- Upskilled my knowledge of relational databases (MSSQL) and solved challenging dataset problems by creating indexes to enhance performance.
- Designed a fast, scalable API using NodeJS to meet customer requirements and business goals.

📜 CERTIFICATIONS

Full Stack Professional(Skill tag) | Infosys Certified React Professional

Infosys Certified NodeJS Professional | Infosys Certified Mongo Developer

Infosys Global Agile Developer Certification

🏆 AWARDS

"INSTA" Award

- Work with dedication and diligence

Letter of Appreciation

- For the calibre of work produced, creativity, and ownership.

Commendable Rating

- Year end performance review.(2021/22)
